

StudyFlow — Software Requirements Specification (SRS)

1. Product Overview

Product Name:

StudyFlow

Product Description:

StudyFlow is a student productivity application designed to help students worldwide organize their academic information, manage courses, track assignments, monitor exams, and analyze their academic progress.

The application provides students with a centralized platform where they can manage their academic activities and improve their productivity.

2. Functional Requirements (FR)

Functional requirements describe what the system shall do.

2.1 User Registration

FR-001: User Registration

The system shall allow new users to create an account.

The registration form shall contain the following mandatory fields:

- First Name
- Last Name
- Email Address
- Password
- Confirm Password

The user shall not be able to complete registration if any required field is empty.

FR-002: Password Validation

The system shall validate user passwords according to the following rules:

The password must:

- Contain only Latin characters.
- Contain at least 8 characters.
- Contain at least one uppercase letter.
- Contain at least one lowercase letter.
- Contain at least one special character.

FR-003: Password Requirement Display

When the user clicks on the password field, the system shall immediately display password requirements.

The displayed requirements shall include:

- Use only Latin characters.
- Minimum 8 characters.
- Include uppercase letters.
- Include lowercase letters.
- Include special characters.

The system shall provide real-time validation:

- Unsatisfied requirements shall be displayed in red.
- Satisfied requirements shall be displayed in green.

The user shall not be able to register until all password requirements are satisfied.

FR-004: Password Visibility

The system shall hide passwords by default.

The Password and Confirm Password fields shall contain an eye icon.

When the user clicks the eye icon:

- The password shall become visible.

When the user clicks the eye icon again:

- The password shall become hidden.

2.2 Registration Confirmation

FR-005: Registration Confirmation Email

After successful registration, the system shall send a confirmation email to the registered email address.

Email:

Subject:

Registration Successful

Message:

"Your account has been successfully registered."

2.3 User Login

FR-006: User Authentication

The system shall allow registered users to log in using:

- Registered email address
- Password

The system shall validate user credentials before granting access.

If incorrect credentials are entered, the system shall display an error message.

2.4 Profile Management

FR-007: Profile Access

The main dashboard shall contain a **Profile** button located in the top-right corner.

After clicking the Profile button, the system shall display:

- Account Information
- Delete Account
- Change Password

FR-008: Account Information

The system shall display user account information:

- First Name
- Last Name

- Email Address

FR-009: Delete Account

When the user selects "Delete Account", the system shall display a confirmation modal.

The modal message:

"Are you sure you want to delete your account?"

The modal shall contain:

- Yes button
- No button

If the user clicks **Yes**:

- The account shall be permanently deleted.
- The user shall be redirected to the registration page.

If the user clicks **No**:

- The modal shall close.
- The account shall remain active.

2.5 Password Change

FR-010: Password Reset Request

When the user selects "Change Password", the system shall display:

Message:

"Enter your email address and follow the instructions sent to your email."

Field:

- Email Address

Button:

- Send

FR-011: Password Reset Email

After submitting the email address, the system shall send a password reset email.

Email subject:

Change Password

The email shall contain:

Button:

Change Password

FR-012: New Password Creation

The password reset page shall contain:

- New Password field
- Confirm Password field

The same password validation rules shall apply.

After successful password change, the system shall send a confirmation email:

"Your password has been successfully changed."

2.6 University Information

FR-013: Add University Information

The system shall allow users to add:

- University/Educational Institution Name
- Field of Study

The user shall save information using:

Button:

Save Changes

After successful saving, the user shall return to the dashboard.

2.7 Subject Management

FR-014: Add Subject

The system shall allow users to create subjects.

Subject creation form:

- Subject Name

The user shall save the subject using:

Button:

Save

The system shall allow users to create multiple subjects.

FR-015: View Subjects

The system shall display all created subjects.

When the user selects a subject, the subject details page shall open.

2.8 Assignment Management

FR-016: Add Assignment Information

Each subject shall contain an assignment management section.

The user shall be able to enter:

- Assignment description
- Deadline
- Status
- Grade

FR-017: Assignment Status

The system shall provide the following assignment statuses:

- Deadline
- Done
- Not Done
- Graded

FR-018: Assignment Deadline

When the user selects Deadline:

- A calendar shall be displayed.
- The user shall select a date.

Required date format:

DD/MM/YYYY

FR-019: Assignment Grade

When selecting "Graded", the system shall provide the following grade options:

- A+
- A
- A-
- B+
- B
- B-
- C+
- C
- C-
- D+
- D
- D-
- E+
- E
- E-
- F

The user shall select only one grade.

2.9 Exam Management

FR-020: Add Exam Dates

The system shall allow users to add:

- Quiz dates
- Midterm exam dates
- Final exam dates

Each date shall be selected using a calendar.

Date format:

DD/MM/YYYY

FR-021: Multiple Exam Dates

The system shall allow users to add multiple dates using:

Button:

Add Another Date

For every added date, the system shall display:

- Exam date
- Number of remaining days

FR-022: Manage Exam Dates

The user shall be able to:

- View dates
- Edit dates

- Delete dates
- Save changes

2.10 Progress Tracking

FR-023: Student Progress Dashboard

The system shall provide a Progress section.

For each subject, the system shall display:

- Number of completed assignments
- Number of incomplete assignments
- Average assignment score
- Average midterm score
- Average final exam score
- Overall average grade

FR-024: Multiple Subject Progress

If the user has multiple subjects:

- Each subject shall have a separate progress section.
- Clicking a subject shall display detailed progress information.

2.11 Navigation Management

FR-025: Back Navigation

The system shall provide navigation functionality on all application pages except the main dashboard/home page.

Each page shall contain a **Back Arrow button** located in the top-left corner of the screen.

When the user clicks the Back Arrow button:

- The user shall be redirected to the previous page.
- The user shall return to the last visited page in the navigation flow.
- The current page data shall remain unchanged unless the user has not saved the changes.

The Back Arrow button shall not be displayed on the main dashboard/home page because it is the starting point of the application.

3. Non-Functional Requirements (NFR)

Non-functional requirements describe how the system shall perform.

NFR-001: Performance — Save Response Time

When the user clicks the **Save Changes** button:

- The system shall save the information.
- A success message shall appear within **2 seconds**.

Message:

"Data has been successfully saved."

NFR-002: Performance — Email Delivery

Password reset and confirmation emails shall be delivered within **10 seconds** after the required action.

NFR-003: Security

The system shall:

- Hide passwords by default.
- Protect user personal information.
- Require authentication before accessing private user data.
- Prevent unauthorized access to user accounts.

NFR-004: Usability

The system shall:

- Provide a simple and intuitive user interface.
- Display clear success and error messages.
- Provide understandable validation instructions.
- Allow users to easily manage academic information.

NFR-005: Reliability

The system shall:

- Save user data correctly.
- Preserve user information after logout/login.

- Prevent data loss during normal usage.

NFR-006: Compatibility

The application shall support students from different countries and educational systems.

The system shall support usage on modern browsers and devices.

NFR-007: Maintainability

The application code shall be organized and maintainable to allow future improvements and feature additions.

NFR-008: Scalability

The system should support increasing numbers of users and academic data without significant performance degradation.
